

1. Contract Scores

Thanks for using Contract Scores! This document has been created to help you familiarize yourself with the contract scores product, with some guidance on the features that we've added to it.

2. Startup

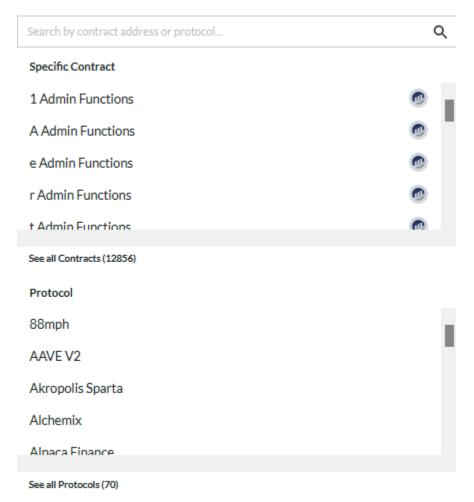

This is the initial screen you will be presented with after logging in. In this screen, you can see the Tabs "All" "Favorites" and "Compared". You can also see the Search function, the "sort by" function, the "filter" function, and the "add to compare" button. Underneath that, you can see the specific contract scores.

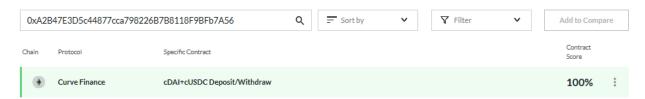

3. Search Bar

Contract Scores includes a powerful search tool so you can easily find whatever contract you're looking for. Search by a specific protocol, or search the name or address of a specific contract.

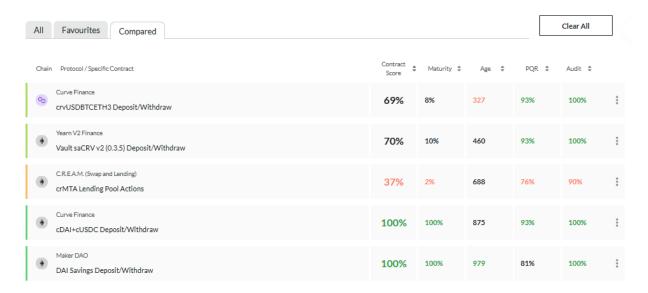

Insert the specific contract address into the search bar to search for it directly.

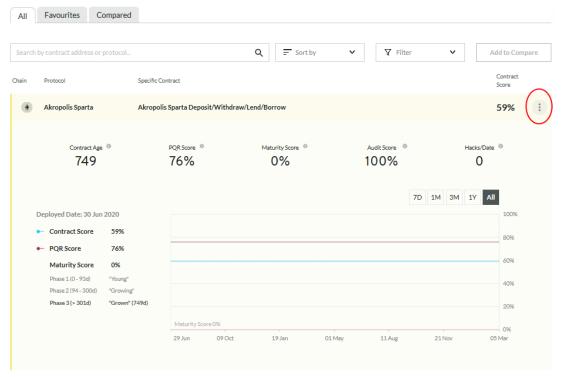

4. Compare Feature

Contract Scores features a "Compare" feature that allows you to directly compare multiple contracts on all metrics we track.

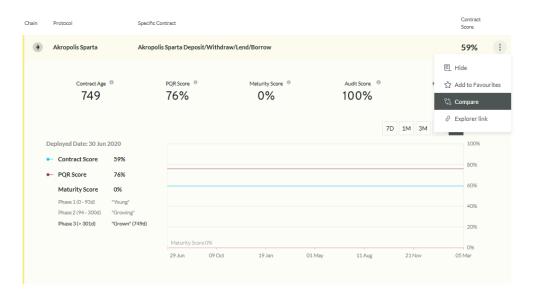

To use the compare feature, first find the contract you are looking to compare using the Contract Scores Search. After that, click on the three dots as indicated on the right side. This will open the sidebar menu.

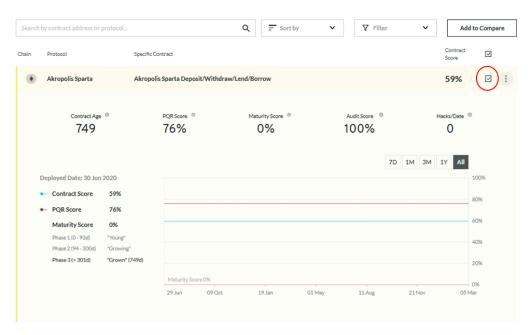

Click on the "Compare" Button in the sidebar menu.

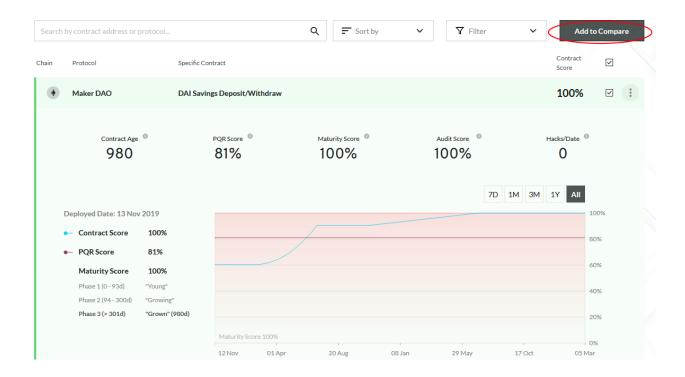

After you click the "Compare" Button, you'll notice that a new checkbox has been added to the left of the sidebar. This indicates that the contract has been selected for the add to compare tool.

After that, click the "add to compare" Button.

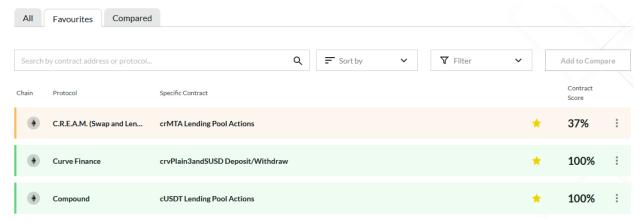

After that, you will be brought to the compare screen. Congrats!

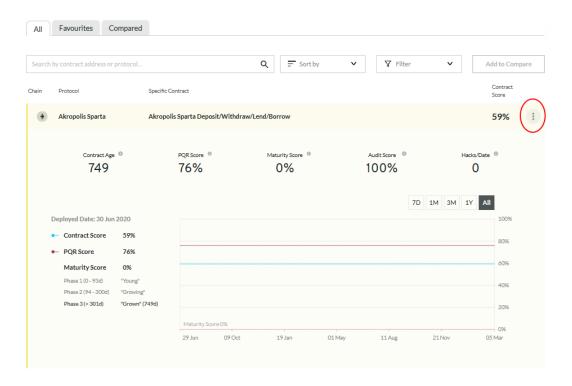

5. Favorites

Contract Scores features a "favorites" tab in order to keep track of which contracts you interact with most.

To add a contract to your favorites, click the three dots on the side of the contract:

Click the "add to favorites" Button.
